

Wound Infection Reagents

Discover our cutting-edge wound infection reagents, which can deliver precise identification of wound infection pathogens.

Sansure offers wound infection reagents that can detect a vast array of pathogens, including *Proteus mirabilis*, *Escherichia coli*, *Acinetobacter sp.*, *Staphylococcus aureus*, *Providencia sp.*, *Klebsiella sp.*, *Pseudomonas aeruginosa*, *Staphylococcus epidermidis*, and *Enterobacter sp.*

Committed to Your Lab's Success

Sansure is committed to helping you for your clinical assay development efforts with our molecular testing solutions and world-class customer support.

Reagents

Our highly sensitive reagents are used in more than 10,000 labs around the world.

Broad Range of Targets

Our research teams have developed reagents to detect hundreds of different pathogens.

World-Class Support

We provide attentive technical and operational customer support to make your research and development programs successful.

Pathogen Targets for Wound Related Infections

9 Wound Pathogens

Proteus mirabilis, *Escherichia coli*, *Acinetobacter sp.*, *Staphylococcus aureus*, *Providencia sp.*, *Klebsiella sp.*, *Pseudomonas aeruginosa*, *Staphylococcus epidermidis*, *Enterobacter sp.*

Proteus mirabilis

Escherichia coli

Acinetobacter sp.

Staphylococcus aureus

Providencia sp.

Klebsiella sp.

Pseudomonas aeruginosa

Staphylococcus epidermidis

Enterobacter sp.

Streptococcus pyogenes (Group A Strep)

Klebsiella pneumoniae

Enterococcus faecalis

Enterococcus faecium

Bacteroides fragilis

Streptococcus agalactiae (Group B Strep)

Bartonella henselae
